

National Access LD slammed by accounts in Fresno California. As the telecommunications administrator for Cold Spring Granite, I am very aware of what to look for and what to do. I have all ready contacted the company and they will be cancelling the service. However, I feel that these companies need to be stopped somehow. Many of the do their billing through USBI which makes me question their practices as well. This has got to stop. I am sick of filing complaint with PUC's all over the country!
